**PRICES** in this catalog cancel all previous lists and quotations, and are subject to change without notice.

**"3 TO 4 FEET"** means that the tree or plant will be 3 feet or over, but under 4 feet; and throughout the list the same.

**STOCK SPECIALLY SELECTED** by customers at the Nurseries will be charged according to the value of the stock chosen, irrespective of catalog price.

**VISITORS WELCOME.** You are invited not only to visit the office, but to go over the extensive grounds as well. There are more than 500 acres in the farm.

**OUR LOCATION.** Near Airport, 6 miles west of city limits, on highway 421 to Winston-Salem. Our shipping point is Guilford College, N. C.

**TERMS, CASH WITH ORDER,** except to persons who satisfy us as to their responsibility, when for their convenience accounts will be opened, due in 30 days from date of invoice.

**AUTO-TRUCK DELIVERIES,** based on actual cost, if no Government regulations to interfere, are made within a reasonable distance of our Nurseries. The advantages of truck delivery are many. Boxing is eliminated, stock arrives in much better condition, and the goods are landed on the ground within a short time after being dug.

**GUARANTEE:** We exercise great care to keep our varieties true to name, and are willing at all times to resupply any stock that may prove otherwise, or to refund the amount paid us therefor (at our option), provided: the account was paid promptly, and we are advised within five years; it is mutually agreed that our responsibility ends with such action. No warranty as to productiveness of any tree or plant we sell is given. Orders shall be void should unavoidable injury befall the stock.

**REPLACEMENTS:** When stock has been properly cared for, and the account paid promptly as agreed, any plants that fail to grow the first season will be resupplied once at half list price at our warehouse or equal value of other items; transportation and planting costs, if any, extra. ("Replacements" refer to retail sales only.)

**OFFICIAL INSPECTION.** We furnish with each shipment a certificate that our Nurseries have been examined by the State Entomologist of North Carolina and found free from contagious diseases.

## CONIFEROUS EVERGREENS

Some locations around the home grounds just seem to call for coniferous evergreens, in some form, either upright, medium or spreading growth, as they lend richness and dignity as no other class of plants can. The varieties offered here are tried and true and will give good results when planted in suitable locations. Most of the sorts require almost full sun, though a few will do very well in partial shade.

## THE BRAMBLES

After the plant has fruited in the spring, the old canes should be removed, cutting off at the ground, and burning. The canes that fruit another season will then come up and be ready to bear the following spring. When first planted, cut back to within 4 or 5 inches of the ground.

Quantities quoted on items below are the smallest lots we can supply--not less than 10 of a variety.

Prices on all as follows: Per 10, \$3.00; 25, \$6.00

## BLACKBERRY PLANTS

These require but little attention, producing good crops of fine berries. They are native to the Piedmont section, and will give excellent results with but little care except keeping the weeds and grass out, in addition to removing the old canes. No staking required.

ALFRED. One of the best sorts; the berries are large and nearly coreless. Productive.

ELDORADO. A strong, upright grower; large juicy berries.

## BOYSENBERRY PLANTS

The berries are very large, delicious flavor. The plant is a very vigorous grower, and for this reason should be planted on medium to rather poor soil, well drained; tie up to a wire fence of about three strands, handling carefully. Thornless type.

## DEWBERRY PLANTS

LUCRETIA. Berries usually larger than Blackberries, some weeks earlier; soft, sweet, luscious!

## RASPBERRY PLANTS

More difficult to grow in Piedmont section, and of but little value in eastern section unless given special attention. The plants do much better if kept mulched. The soil must be good, and the deeper the better.

CUMBERLAND is the standard black sort, and is a favorite where black raspberries are desired.

LATHAM is recommended as being one of the good ones; a thrifty grower, bright red berries.

Note: Not less than 10 of a kind sold in any 1 order.

In addition to the trees and plants mentioned in the foregoing pages, we have quite a lot of other varieties in small quantities, and in a number of cases larger sizes than quoted herein. So if you have special items or sizes different from this list, let us know your needs and the chances are that we can supply. If we do not have it, perhaps we can locate with some of our connections. Write us about any trees or plants that you have in mind.

## **THE LINDLEY NURSERIES**

have been in business since 1842, and within a few miles of the original location. Now starting well into the second century.

*Experienced*

*Progressive*

*Dependable*

Beginning in a small way in 1842, with a select list of fruit trees, it has grown till today there are more than five hundred acres in the nursery farm. Almost all types of trees and plants are now produced, as well as our doing extensive landscape work.

With our facilities and experience, we are in a position to handle your business along this line in a manner satisfactory to you, and shall be glad to hear from you. Write, telephone, call in person; we are here to serve you, and our representatives travel widely.

We now have, we believe, the most modern warehouse, storage cellar, and office of any nursery in the South, and we invite your inspection.
